Md Rezaul Karim

Master's Student, International Management & Information Systems | Operations Transformation, Process Optimization, Data & Analytics

Soest, Germany | myselfrezaul@gmail.com | +49 1577 3855748 | LinkedIn | Portfolio

PROFILE

Master's student in International Management & Information Systems with two years of operational leadership experience and current project work across process optimization, SAP-based analytics, Agile coordination, and workflow automation. Comfortable translating business requirements into structured processes, KPI views, and implementation tasks for cross-functional teams. Seeking to contribute to PwC's Operations Transformation projects in areas such as Data & Analytics, Supply Chain, Procurement, Manufacturing & Service, and Operations Strategy.

PWC OPERATIONS TRANSFORMATION FIT

Operations and process improvement Daily operations coordination, budget tracking, purchase orders, resource allocation, documentation, and workflow improvement.	**Data, analytics, and ERP** SAP BW/4HANA data warehousing, KPI reporting, Power BI, KNIME, data analysis, and SAP-integrated management coursework.
Project work and consulting mindset Academic and consultancy projects using Jira, BPMN 2.0, and scalable tracking models to improve execution and stakeholder visibility.	**Communication and delivery tools** Microsoft Office 365, Excel, PowerPoint, Jira, Confluence, documentation, presentations, and bilingual English working capability; German A1, currently learning A2.

EXPERIENCE

Assistant Manager | Renaissance Diagnostic Care

07/2022 - 05/2024

- Coordinated day-to-day administrative operations and cross-functional communication to keep service workflows structured and reliable.
- Supported budget tracking, purchase order handling, and resource allocation, strengthening operational transparency and cost discipline.
- Organized internal documentation and operational assets in line with company guidelines, improving consistency and audit readiness.
- Identified recurring operational trends and supported management in implementing practical process improvements.

SELECTED PROJECTS

SAP BW/4HANA: End-to-End Data Warehousing Project

08/2025

- Built a multi-layer Enterprise Data Warehouse structure in SAP HANA Studio, including DataSources, transformations, and ADSOs.
- Designed BW queries for KPI and sales trend analysis and configured master data hierarchies to support reliable business reporting.
- Connected technical data modeling with management decision needs, aligning with operations transformation and analytics use cases.

NexTep Edu | Consultancy

05/2025 - Present | https://www.nextepedu.com

- Mapped admission workflows with BPMN 2.0 and automated standard tasks, reducing manual processing time by 40%.
- Designed a self-service tracking model for student applications, lowering the need for repeated manual status updates.
- Created a scalable digital framework to handle, track, and organize client inquiries with lower maintenance effort.

Agile Event Coordination | Academic Project

03/2026 - Present

- Set up and managed Jira Kanban boards for large-scale university events, including alumni gatherings and IMIS Sports Day.
- Converted complex event logistics into actionable tickets and tracked progress from backlog to completion.
- Applied Agile routines to coordinate catering, team sign-ups, equipment sourcing, and stakeholder communication.
